DESCRIPTORS	*Architectural Barriers; *Building Design; *Consultants; *Handicapped

ABSTRACT

The book presents a directory of consultants on barrier free environments for handicapped people. The directory is organized into three sections. The principal section is arranged geographically, with consultants listed alphabetically within states. A profile of each consultant is provided, giving address, telephone number, professional category, type of services available, a brief summary of experience with accessibility projects, and names and addresses of up to two references. In the second section, consultants are listed by professional or agency category, arranged alphabetically by name within categories. The third section is an alphabetical name index. Both sections 2 and 3 have page references to the consultant profile in the geographical section. (DLS)

196 NAME INDEX

Foreword

With the publication of Community Services Administration regulations implementing Section 504 of the Rehabilitation Act of 1973, CSA grantee and delegate agencies are faced with the challenge of making facilities and services accessible to handicapped people. In most cases an initial step will be that of surveying a facility for environmental barriers. Where necessary, structural modifications can then be planned, or the program moved to an accessible location.

To carry out this effort, the assistance of professional or voluntary resource people who are knowledgeable about the environmental needs of handicapped people may be required. CSA has published this directory of consultants on accessible environments to help agencies identify local sources of technical assistance.

Accessibility Assistance is another project in a continuing program of the Community Services Administration to provide support for Section 504 compliance efforts of its grantee and delegate agencies. *Opening Doors: A Guide to Making Facilities Accessible to Handicapped People*, the first publication in this series, is available from the Office of Policy, Planning and Evaluation, Community Services Administration, 1200 Nineteenth Street NW, Washington, DC 20506.

Using the Directory

Listing in this directory was open to all consultants concerned with the design needs of handicapped people. Applications were received from professional firms that may be retained on a fee basis and from organizations and individuals whose services are provided free as a public service. Information on services and experience of each listed consultant was provided by the applicant.

In using the directory, each agency should investigate the competence and qualifications of any consultant they consider retaining. It is recommended that each consultant's qualifications be assessed by personal interviews, checking previous projects, and contacting references. Where no references have been listed, local organizations of handicapped people, voluntary service providers or municipal or state human services agencies may be able to provide information on a consultant's work in the field of planning for handicapped people.

The information presented in this publication is based solely on the applications submitted by the listed consultants, and has not been evaluated or validated by the Community Services Administration, its contractor the National Center for a Barrier Free Environment, or any other person or agency. Responsibility for accuracy of the information rests solely with the listed consultants. Listing in the directory does not constitute an endorsement by the Community Services Administration or its contractor the National Center for a Barrier Free Environment, nor should any unfavorable inference be drawn from failure to be listed.

This directory is organized in three sections. The principal section is arranged geographically, with consultants listed alphabetically within states. This listing presents a profile of each consultant, giving address, telephone number, professional category of the consultant, type of services available and a brief summary of experience with accessibility projects. Names and addresses of up to two references are provided for each consultant.

In the second section, consultants are listed by professional or agency category, arranged alphabetically by name within categories. The third section is an alphabetical name index. Both sections have page references to the consultant profile listings in the geographical section.

Accessibility Assistance was compiled by Margaret Milner, Project Director for the National Center for a Barrier Free Environment, under the direction of Rudy Frank, Project Officer, Office of Policy, Planning and Evaluation, Community Services Administration.

Consultant Profiles

Alabama

Alabama Society for Crippled Children and Adults, Inc.
2125 East South Boulevard
PO Box 6130
Montgomery, Alabama 36106

Special Consultant
(205)288-8382

Contact: Charles T. Higgins, Executive Director

Services: barrier surveys; recommendations on organizing barrier removal programs and establishing priorities; consultation on design or modification of facilities
no fee for services; reimbursement of expenses

Accessibility Projects: writing of state accessibility law and subsequent amendments

Governor's Committee on Employment of the Handicapped
